Project Manager

Joint Programming Initiative on  
Antimicrobial Resistance

Swedish Research Council

# The JPIAMR – Aims

JPIAMR will develop scientific proposals which will lead to sustainable use of antibiotics to treat infectious diseases and to a decrease in the number of patients with resistant infections in Europe.

It aims to integrate relevant scientific fields across national borders and to create a common Strategic Research Agenda with a shared common vision where the best resources and capabilities are coordinated.

JPIAMR provides the forum and platform for initiating and coordinating joint actions jointly with Stakeholders beyond issuing joint calls.

# JPIAMR

## Strategic Working Groups

- WG1 SRA implementation (Germany)
  - E.g. exploratory workshops (research infrastructures, diagnostics...)
  - E.g. Joint calls
- WG2 Alignment (UK)
  - E.g. Establish an AMR national research programmes alignment strategy
- WG3 Evaluation (Spain)
  - E.g. common database
- WG4 Internationalisation (Sweden)
  - International partnership scheme

# Alignment action lines

1. Alignment with national strategies on AMR
2. Alignment with national funding
3. Alignment at institutional level
4. Aligning resources and technologies
5. Alignment with Industry
6. Aligning with national policies

# Action Plan

Approved in September 2014

- Short term
  - Mapping phase II and collection of national policies
  - Identify national opportunities to raise the profile of SRA
  - Develop a plan to align where appropriate national strategies and programmes
- Medium term
  - Develop a plan to encourage key research institutions in AMR to align better their research strategies with the SRA
  - Alignment with industry
- Long term
  - Align funding of AMR research and evaluation
