Stakeholders' involvement, participatory modelling and policy analysis.		
<b>Short Description of your Institution:</b>		
<p>The Water Research Institute (IRSA) is part of the Italian National Research Council (CNR). For more than 40 years, IRSA has been performing research activities focused on the management of surface and groundwater resources and for the improvement of water and wastewater treatment technologies. IRSA has been involved in numerous research projects on process technologies, pilot and full-scale plant design, cost evaluation and dissemination of results, behaviour of surface and groundwater resources under scarcity conditions, the development of novel tools and process technologies for increasing available water resources and sustainable treatment technologies for agricultural reuse of treated wastewater.</p>		
<b>Role in the project:</b>		
Leader of WP4		

Date, Tuesday 27 June 2016
