Areas of Expertise:		
Agronomy – Irrigation engineering – Wastewater reuse in agriculture – Health risk assessment from the use of treated wastewater for irrigation – Stakeholder’s involvement.		
Short Description of your Institution:		
<p>The Water Research Institute (IRSA) is part of the Italian National Research Council (CNR). For more than 40 years, IRSA has been performing research activities focused on the management of surface and groundwater resources and for the improvement of water and wastewater treatment technologies. / CIHEAM is an intergovernmental institution with an extended multi-disciplinary experience in both technical and soil aspects of Mediterranean agriculture and resources through its activities in research, training and cooperation projects. The Mediterranean Agronomic Institute of Bari (MAIB) is a centre for post-graduate training, applied scientific research and design of in-loco partnership actions in the framework of the international cooperation programmes. It works in four thematic areas: “Land and water resources management”, “Integrated pest management of Mediterranean fruit and vegetable crops”, “Mediterranean organic agriculture” and “Sustainable agriculture, food and rural development”.</p>		
Role in the project:		
Researcher - Contact Point for Communication/Dissemination activities and for Open Data/Open Access activities
