

Name SURNAME: Stefania Meucci		
Function:	the major socio, the legal representative and technical director	
Institution:	MMI s.r.l. (Modelling and Monitoring Hydrology) (Italy)	<input type="checkbox"/> Funding Agency <input type="checkbox"/> Programme Manager
Email:	stefania.meucci@mmidro.it	
Phone:		
Division		
Areas of Expertise:		
<p>Stefania Meucci took the master degree in Polytechnic of Milano in 1998 in Civil engineering and from 2004 is major member, legal representative and technical director of the MMI ltd (Hydrological Modelling and Monitoring). Senior engineering with experience in design of water engineering structure and river basin reclamations for hydraulic risk mitigation for flood and drought</p>		
Short Description of your Institution:		
<p>MMI s.r.l. (Modelling and Monitoring Hydrology) is a Italian engineering company with more than 10 years of experience in the field of water engineering specialized in flood and droughts hydraulic risk mitigation. MMI ltd is a company founded as start-up of Polytechnic di Milano for developing hydrological monitoring and modelling, analysis and decision support systems for sustainable management of water resources, engineering design for hydraulic risk mitigation, hydraulic network design.</p>		
Role in the project:		
<p>MMI will be responsible of the engineering activities connected to the tool implementation at farm as well as at basin authority level. This will consider the acquisition and the organization in a database of ground data; the implementation of the hydraulic numerical modelling of the irrigation network; perform discharge and volume measures; develop a control dashboard for the visualization of the actual and forecasted soil moisture (WP2,WP7).</p>
