| Short Description of your Institution: | | | |
| <p>DICAM hosts a Centre of excellence in the area of hydraulic protection of mountain areas (CUDAM) set up under the competitive project MIUR /COFINLAB (DM 245 of 23.11.2001). Since 2004 the Centre has been recognized as Expertise by the National Civil Protection Department, in Italy. Over the years, CUDAM has gained a large experience in the analysis and in the monitoring of the most popular works on flood protection and stabilization in mountain area. With this project, the members of CUDAM intend to pursue their research and increase their knowledge.</p> | | | |
| Role in the project: | | | |
| Leader of WP4 | | | |
