

Name SURNAME: Dominik ZAK		
Function:		
Institution:	Leibniz-Institute of Freshwater Ecology and Inland Fisheries	<input type="checkbox"/> Funding Agency x Programme Manager
Email:	zak@igb-berlin.de	
Phone:	0049 (0)3064181730	
Division	Chemical Analytics and Biogeochemistry	
Areas of Expertise:		
wetland restoration and management, biogeochemistry, chemical analytics, organic matter turnover and matter fluxes		
Short Description of your Institution:		
<p>The Leibniz-Institute of Freshwater Ecology and Inland Fisheries (IGB) is a creative, lively and diverse place for conducting research and teaching. Scientists from a whole range of disciplines work under one roof at our Berlin and Neuglobsow sites. Hydrologists, chemists, physicists, microbiologists, limnologists, fish ecologists and fisheries biologists from all over the world investigate the fundamental processes governing rivers, lakes and wetlands. IGB has improved existing and established new and unique research infrastructure including laboratory, large-scale experimental facilities and established new analytical methods and in-situ techniques to support the manifold research activities. Overall it allows processed-based understanding of biogeochemical cycles in aquatic ecosystems and their boundaries; thereby supporting evidence-based wetland restoration.</p>		
Role in the project:		
Leader for WP1
