|--|--|--|
| <b>Name SURNAME: Battaglia-Brunet Fabienne</b>   |  | <br>Photo |
| <b>Function:</b>   | Researcher Microbiologist                                    |  |
| <b>Institution:</b>  | BRGM   | <input type="checkbox"/> Funding Agency<br><input type="checkbox"/> Programme Manager        |
| <b>Email:</b>  | <a href="mailto:f.battaglia@brgm.fr">f.battaglia@brgm.fr</a> |  |
| <b>Phone:</b>  | 33 2 38 64 39 30   |  |
| <b>Division</b>  | Water, Environment and Ecotechnologies Division              |  |
| <b>Areas of Expertise:</b>   |  |  |
| <p>Microbiology of environments rich in metals and metalloids. Sulfate-reducing bacteria taking part in the biotransformation of metals and metalloids (CrVI, AsIII, and AsV); biological treatment of mining and industrial effluents and groundwaters; biogeochemical processes involved in arsenic oxidation and reduction in soils, sediments and water.</p> |  |  |
| <b>Short Description of your Institution:</b>  |  |  |
| <p>BRGM (Bureau de Recherches Géologiques et Minières) is the French geological survey, i.e. the France's reference public institution for Earth Science applications in the management of surface and subsurface resources and risks.</p>   |  |  |
| <b>Role in the project:</b>  |  |  |
| <p>Leader of WP2: Effect of agricultural practices on arsenic concentration, bioavailability and toxicity in water and soil</p>  |  |  |

Date: 2017 March 7th
