

2017 JUNT CALL

Water Challenges for a Changing World

Water Resource Management in support of the United Nations Sustainable Development Goals

ELECTRONIC SUBMISSION PLATFORM

GUIDELINES FOR APPLICANTS

I.IMPORTANT INFORMATION

IMPORTANT: This online platform corresponds to an adaptation of the French National Research Agency (ANR) electronic submission tool. In accordance, you will find some fields that are blocked because they are needed for French Applicants to the national call. These blocked fields are considered irrelevant to this International Joint Call, please disregard these aspects when filling in the data of your pre-proposal.

IMPORTANT – PROJECT ACRONYM: Please, select carefully the acronym for your project in order to avoid any Intellectual Proprerty Rights (IPR) issues and therefore ensure a correct project implementation. **DO NOT USE** any acronym which is dentical or similar to a registered trade mark, and/or applied for identical or similar goods and/or services. This is extremely important if you plan to commercially exploit and market potential results under the acronym of the project, since such use may lead to trade mark infringement procedures. It is also worthwhile you think about registering your acronym as a trademark in case you want to carry out a commercial activity using this acronym. You can find more information on this issues here https://www.iprhelpdesk.eu/sites/default/files/documents/EU_IPR_IP-Guide.pdf

Please follow these Guidelines for the Electronic Submission Platform, in order to make sure you do not miss any important information you should provide and consult the document on the FAQ available on the 2017 Joint Call Webpage.

NOTE: You can choose the language of your screen (French or English) by clicking on the flag at the top of the screen (right side).

Consortium Composition

For each project, a project Coordinator is appointed. Each project Partner appoints ONE scientific and technical representative for his/her team (the **Principal Investigator - PI -**). The project Coordinator will create the pre-proposal in the submission platform and add the project Partners. Once that is done, Partners will receive an invitation mail to connect to the platform. They will be able to check the information provided by the Coordinator and modify their administrative and financial data if necessary.

Each modified page in the submission platform must be saved before going to another page.

I0. HOW TO HAVE AN OVERVIEW OF YOUR PROJECT

The last two tabs "Summary tables" and "Submission of the project" provide synthetic information about the project data. You can use them to verify the consistency of the provided information.

The **Tab Summary Tables** gathers different synthetic tables:

- -the project partnership
- -the detailed financial resume of the proposal
- -the involvement by partner and task (person.month)
- -the full costs by partner and task

These tables are automatically filled in using the data provided in the partner forms. Please note that the table person.month will be empty but could not be removed. Since we are not requesting to breakdown the budget into tasks for pre-proposals, the last table will present just one column called Task.

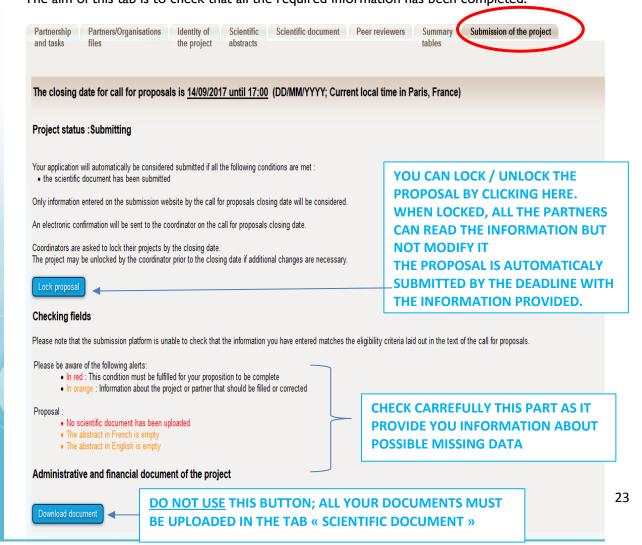

In the bottom of the page you can click on a button to download a full summary of the project in Excel format.

II. HOW TO VERIFY AND SUBMIT YOUR PROPOSAL

The **Tab Submission of the project** allows you to submit your proposal:

Please note that when the proposal is locked, it can be unlocked later on if necessary by clicking on the **Unlock** button:

The project is automatically submitted at the closing date (if the scientific document is uploaded and the requested funding is different from 0).

After the closing date, the project can be seen by all the project partners but it cannot be changed any more.

NOTE: Please note that as project Coordinator, you cannot delete a proposal you have created. If you want to delete a proposal, you must send a request to ic4watersecretariat@agencerecherche.fr
