The more we know, the better we can act.

GSES-System and Solobal Sustainable Enterprise System

Towards a strong(er) Blue Economy by future proof investments, ESG-ratings and ambitious operations for global impact on the SDGs

Kelly Ruigrok's Presentation for the Water JPI Workshop on January 28th 2021

The Blue Economy

- The Seventh largest Economy in the World by GDP globally
- Worth 24 trillion (Ocean Assets) and growing
 - > Financial stewardship is needed to maintain future value
 - Climate Change, Overfishing, Habitat Destruction
 - > Investments in SDG 12 cascade on other SDG

GSES-System

- Global Operating ESG-Rating Platform servicing companies and governments worldwide
- Ratings: CO2, Circular Procurement, Health and Safety, Biodiversity and CSR through the whole supply chain on product, process and organization level
 - Integrating the Sustainable Accounting Standards Board
 - > Linked to the SDGs
 - BlueScan (maritime) and ABN Amro (bank)

Data for Good

- Independent global connector
- Acting towards attaining the SDGs
- Monitoring & impact measuring
- Science-based scenario plotting
- Free and accessible platform

THE INDICATOR AT A GLANCE

Indicator 6.3.1 tracks the percentage of wastewater flows from households, services, and industrial premises that are treated in compliance with national or local standards.

Data on 6.3.1 are commonly collected by national line ministries and institutions (e.g. for Water, Sanitation, Environment, Health, Public Services, Planning, Housing, Infrastructure, Production), utilities and on-site service providers as well as the National Statistical Office (household surveys and registers of economic activities).

Proportion of safely treated domestic wastewater flows (%)
