

#### BiodivERsA and Water JPI 2020-2021 COFUND Call for Transnational Research Proposals on "Conservation and restoration of degraded ecosystems and their biodiversity, including a focus on aquatic systems"

# Funding organisation funding rules

You will find in this document all the eligibility rules of the different Funding Organisations participating to this Call.

Please note that the document may be adjusted. We invite you to make sure you have the latest version. If a new version is uploaded on the website, a warning message will be indicated on the <u>BiodivERsA</u> and <u>Water JPI</u> website.

Please make sure to consult these rules and to contact your Funding Organisations Contact Point for more information, in case of any doubt.

We draw your attention on the fact that **compliance to Funding Organisations eligibility criteria and rules is mandatory**. Proposals that do not meet these criteria will be declined without further review.

#### Who is addressed by this information?

This document contains information on specific requirements for Partners applying for FWF funding. Please note that it is mandatory to follow the requirements described below. To make sure that all requirements are met and to receive latest information, please contact your respective funding organisation contact point.

#### **IMPORTANT INFORMATION:**

In addition to the application at the call secretariat administrative data (in accordance with the FWF guidelines for stand-alone projects) must be submitted online to the FWF at <a href="https://elane.fwf.ac.at/">https://elane.fwf.ac.at/</a>

This is required already at the pre-proposal stage via the programme category "IK – International Projects (preproposal, deadline 07. December 2020)".

For the full proposal stage applicants must choose the programme category "I – International Projects". Both steps are mandatory.

For submissions to be valid, the cover sheet generated at the end of the online submission process must be printed out and signed. It can then either be sent to the FWF by conventional mail (FWF, Sensengasse 1, 1090 Vienna) or scanned in, given a digital signature and sent to the FWF (<u>office@fwf.ac.at</u>) as an e-mail attachment.

Please note that the number of ongoing/approved projects in which one researcher can serve as principal investigator is limited to three in the Stand-Alone Projects Programme, International Programmes, Clinical Research and Arts-Based Research Programmes.

Information on the limit of the number of ongoing/approved projects and thus the limit of applications that can be submitted can be found at <a href="https://www.fwf.ac.at/fileadmin/files/Dokumente/Antragstellung/project number limit.pdf">https://www.fwf.ac.at/fileadmin/files/Dokumente/Antragstellung/project number limit.pdf</a> For information on submitting an application from abroad see the FWF Website at <a href="https://www.fwf.ac.at/en/research-funding/applications-from-abroad/">https://www.fwf.ac.at/en/research-funding/applications-from-abroad/</a>

Applicants must show that they possess the research qualifications needed to carry out the project by means of a publication record over the last 5 years commensurate with their career stage, which demonstrates their international visibility.

The following criteria are decisive in assessing an applicant's publication record and initiating the review process:

• **Peer review**: All the publications listed (or more than half in the case of the humanities) must have been subject to a quality assurance procedure in line with high international standards, which usually means that journals should be listed in the Web of Science,

Scopus, or the Directory of Open Access Journals (DOAJ). For journals not listed in those databases, or monographs, edited volumes or contributions therein, or other publication types, the peer-review procedure must be documented on the publisher's website to which applicants should provide a link. Should no such documentation be available on the website, it is the applicant's responsibility to provide evidence that the publication has been subject to an appropriate quality assurance procedure.

- **Number and quality** of the applicant's publications must be commensurate with his/her career stage. At least two publications must be peer-reviewed and internationally visible publications with a substantial and independent contribution on the part of the applicant.
- International nature: In the natural sciences, life sciences, and social sciences, most of the publications listed must be in English. In the humanities and cultural studies, as well as arts-based research, most of the applicant's publications must have a wider than national reach.

Should an applicant fail to meet one or more of the above criteria, the applicant must include an explanation with the application. In cases of doubt, the decision-making bodies of the FWF shall decide whether the research qualifications are adequate.

#### Who is addressed by this information?

This document contains information on specific requirements for Partners applying for FWO funding. Please note that **it is mandatory to follow the requirements described below**. To make sure that all requirements are met and to receive latest information, please contact your respective funding organisation contact point.

#### **IMPORTANT INFORMATION:**

The FWO Strategic Basic Research Projects (SBO), next to the more fundamental oriented research projects, are also integrated in this call, with <u>specific regulations</u>. It is, in the light of the projects eligibility, of utmost importance to respect these rules, e.g. when it comes to the mandatory valorisation aspect. It is consequently strongly advised to contact the FWO contact point (see below) with any questions, in order not to jeopardize any research projects.

| Eligible themes and environment  | All environments, themes and topics are fundable, if they fit the appropriate funding channels scope.  |
| Additional specific rules  | <ul> <li>→ Mandatory valorisation plan for SBO projects!</li> <li>Strategic Basic Research projects imply projects with a primarily economic or societal finality. Valorisation is a mandatory feature in the SBO applications. We ask researchers to provide us with a 'valorisation plan' before the pre-proposal submission deadline. There is no fixed format and one A4 page should suffice. What the FWO wants to know is i) how the valorisation within Flanders - and potentially internationally – will take place and ii) which Flemish actors are involved in this exercise. This information can be submitted to the general eranet@fwo.be email address.</li> <li>Researchers have to inform the central research coordination units, at their host institutions, about their participation.</li> <li>One and the same researcher can only participate in 2 different research projects/consortia when applying for FWO funding, within the same call.</li> </ul> |

| Minimum and/or maximum requested<br>budget per Partner and/or per Project | <ul> <li>The maximum available FWO budget per project/consortium is 250,000 EUR, overhead included.</li> <li>Beware, the funding rules differ per FWO funding channel (FO and SBO). Also, for the overhead calculation the fundamental (FO) and strategic research projects (SBO) use a different rationale:</li> <li>FO: a 6% structural overhead should be calculated on the direct costs and inserted in the overhead category.</li> <li>SBO: The SBO cost model applies. For information, a 17% overhead rate is commonplace.</li> </ul> |
|---|--|
|   | It is not possible to combine FWO budget<br>with federal budget (BELSPO funding) within<br>the same consortium. In other words,<br>regional and federal budget cannot be<br>concentrated within one and the same<br>project consortium, also when it implies<br>different researchers and institutions.<br><b>Consortia with both FWO and BELSPO</b><br><b>funding will thus be declared ineligible</b> .<br>Consequently, it is strongly advised to<br>contact the funding contact points in order  |

#### Who is addressed by this information?

This document contains information on specific requirements for Partners applying for BNSF funding. Please note that **it is mandatory to follow the requirements described below**. To make sure that all requirements are met and to receive latest information, please contact your respective funding organisation contact point.

#### **IMPORTANT INFORMATION:**

Applicants under this procedure shall be directly responsible for the implementation of the activities under the project proposal and shall not act as intermediaries, but they shall carry out activities under the project proposal on their behalf and at their expense. Applicants to this procedure must be entities:

- Carrying out fundamental research studies; and
- Whose activities are entirely of a non-profit nature; or
- Whose activities are of both for-profit and not-for-profit nature, but these activities are clearly distinguished and their organization allows tracking of revenue and expenditures connected with their implementation, including by keeping analytical accounting. In the event that an applicant is involved in both for-profit and not-forprofit activities, the funding, expenditures and revenues shall be taken into account separately for each type of activity and on the basis of consistently applied principles of accounting of expenditures being justifiable.

# National Official paperwork to complete and sign (including addresses where to send them)

Czech applicants are requested to submit:

- Sworn statement of the applicant;
- TACR Application Form Excel file;
- if the applicant plans to achieve the "Patent" type of result, patent search must be substantiated.

All documents proving the eligibility of the Czech partner stated above are available on <u>TACR's</u> <u>website</u> and shall be submitted via the TACR data box (TACR data box ID: **afth9xp**) within the same deadline as project pre-proposals.

Please fill in the subject line as: "Horizon2020 - BiodivRestore Call 2020 - prokázání způsobilosti – project acronym".

#### **Further comments**

- The aid intensity for each Czech candidate in the project is determined based on the type of entity and type of research according to <u>the Regulation</u> (see table below) and at the same time must not exceed the maximum permissible aid intensity for the Czech part of the project, which is **85 % of eligible costs**.

\* An SME is defined in Article 2 paragraph 2 and Annex 1 of the Regulation; a large enterprise is defined in Article 2 paragraph 24 of the Regulation.

\*\* A research organization is defined under Article 2 paragraph 83 of the Regulation. The indicated funding rate is intended for non-economic activities of the research organisations (see also items 19 and 20 of the Framework<sup>2</sup>).

\*\*\* Effective cooperation - the aid can be increased by up to 15% if the applicant fulfills the conditions according to the Regulation Article 25.

TA CR will check following **eligibility criteria** at the national level:

- the project meets the definition of applied research;
- the aim of the project is relevant to the overall aim of the PROSTŘEDÍ PRO ŽIVOT programme;
- the research results correspond to the national rules (see below) and are applicable / exploitable;
- the industrial research and experimental development share corresponds to the activities of the Czech partner as described in the project proposal;
- the applicants are eligible;
- the costs are eligible;
- the requested funding meets the national regulations for aid intensity (see above);
- the applicants have published the financial statements for the requested years.

Czech applicants will be financed from the "PROSTŘEDÍ PRO ŽIVOT" programme - *subprogramme* 2: "Ekoinovace, technologie a postupy pro ochranu životního prostředí." Relevance to the programme/subprogramme objectives is examined as a part of the eligibility check.

#### Participation of the French applicants

Please refer to one of the Call eligibility criteria: "The project coordinator (person in charge) can only participate as coordinator in one proposal. Apart from the position of coordinator, applicants can participate in several proposals".

#### Minimum and/or maximum project duration:

The project duration is 3 years.

# Country: Germany

Funding Organisations:

# Deutsche Forschungsgemeinschaft (DFG)

Bundesministerium für Bildung und Forschung (BMBF)/ VDI/VDE Innovation + Technik GmbH – Projektträger (VDI/VDE-IT)

#### Who is addressed by this information?

This document contains information on specific requirements for Partners applying for DFG or BMBF/ VDI/VDE-IT funding. Please note that it is **mandatory to follow the requirements described below**. To make sure that all requirements are met and to receive latest information, please contact your respective funding organisation contact point.

#### 1) Procedure

#### Pre-Proposals:

Pre-proposals submitted by applicants applying for funds from a German research organisation (DFG or BMBF/ VDI/VDE-IT) will be examined as to their eligibility. If eligibility is given for one of these research funding organisations, the general eligibility is established. <u>Full Proposals</u>:

As a service for the German community, all submitted full proposals including funds applied for at a German research funding organization will be processed according to a uniform procedure. In addition to the mandatory submission of all proposals to the BiodivERsA Call Secretariat, **all proposals applying for** *DFG or BMBF/VDI/VDE-IT* funds must be submitted to **DFG via the** <u>DFG elan portal</u>. For more details, please check the document to help you with DFG's elan portal at the end of the German FO rules. Please note that this also applies to applicants who only are eligible pursuant to the BMBF/VDI/VDE-IT guidelines. The proposal documents must be submitted via the DFG elan portal by the same deadline plus three working days as the full proposals to the BiodivERsA Call Secretariat. Subsequently, responsibilities for applications will be assigned among German funding agencies.

#### 2) Technical advice

Submission of full proposals via DFG's Electronic Proposal Processing System (elan)

For each member of the consortium applying for funding from a German research funding organisation (DFG *or* BMBF/VDI/VDE-IT) the following process must be followed. In the following, these members of the consortium are referred to as "German applicants", which only means that they are applying for "German money", but not that these applicants' nationality must be German.

Please note that **before submission of the full proposal, each German applicant must be registered in the elan system**. (Registration of all German applicants should be finished three weeks in advance of the deadline for submitting full proposals at the latest.)

The proposal form (elektronisches Antragsformular) must be submitted via the DFG's Electronic Proposal Processing System (elan).

Please <u>select</u> as follows:

- Proposal Submission / New Project (Antragstellung / Neues Projekt)
- Individual Grants Programme (Einzelförderung)
- Proposal for a Research Grant (Antrag auf eine Sachbeihilfe)
- -> Start online form (-> Online-Formular starten)

For information on and access to elan go to

http://www.dfg.de/en/research\_funding/principles\_dfg\_funding/elan/index.html

After submitting the proposal, you will automatically receive a compliance form by e-mail. This form must be printed out and returned to DFG with the original signatures of all German applicants.

# **3)** Important information on eligibility for researchers from non-university Institutions:

#### <u>DFG</u>

The duty to cooperate does not apply for this call. ("Es gilt keine Kooperationspflicht.")

#### BMBF/VDI/VDE-IT

All applicants from non-university research organisations (Helmholtz, Max-Planck, Leibniz Centres) must follow specific application rules (cf. section ELIGIBILITY). These applicants should contact the *Funding Organisation Contact Point (FCP) at VDI/VDE-IT*.

#### Minimum and/or maximum project duration:

Project duration up to 36 months.

National Official paperwork to complete and sign (including addresses where to send them)

#### DFG:

For full proposals: Please find detailed information on the DFG online form and procedure for full proposals on: BiodivER sA

#### BMBF/ VDI/VDE-IT:

Until the funding decision, no additional forms have to be filled. Application forms (e.g. Easy-AZA/AZAP or Easy-AZK) have to be filled and signed only for projects designated for funding and only on request by VDI/VDE-IT. Applicants should read and follow the instructions of the «Richtlinien für Zuwendungsanträge auf Ausgabenbasis» or «Richtlinien für Zuwendungsanträge auf Kostenbasis», depending on the legal status of the applicant's institution. All forms to be filled are available at:

https://foerderportal.bund.de/easy/easy\_index.php?auswahl=easy\_formulare&formularschrank=bm bf

Forms should be send <u>both on paper and electronically, but only on request by VDI/VDE-IT</u> to: VDI/VDE Innovation + Technik GmbH, Bereich ADM - Projektträger Lebenswissenschaften, Steinplatz 1, 10623 Berlin.

#### **Data Protection Notice:**

Please note the DFG's data protection notice on research funding, which can be viewed and downloaded at www.dfg.de/privacy\_policy.

If necessary, please also forward this information to those persons whose data the DFG processes because they are involved in your project.

**Minimum and/or maximum project duration**: Projects may last up to 36 months, which implies the funding has to be budgeted and spent accordingly. Extensions are not allowed in this phase.

#### **Further comments**

- Funding will be awarded as non-repayable project grant.
- Non-eligible Dutch partners may participate in a consortium at their own expense (i.e. as non-funded partner).

#### Terms and conditions

The subsidy is coming from the Ministry of Agriculture, Nature and Food Quality (LNV). Therefore, the following conditions apply.

1) For Wageningen Research (WR) as a TO2 institute and for the National Institute for Public Health and the Environment (RIVM):

Tariff agreements under respectively 'TO2 regeling' (<u>https://wetten.overheid.nl/BWBR0040605/2018-07-25</u>) for WR and 'Raamafspraken Rijksopdrachtgevers – RIVM' (including addenda) for RIVM. 2020 tariffs apply for the complete duration of the project.

#### 2) Other Dutch knowledge organizations and universities:

De Kaderwet EZK- en LNV subsidies (<u>https://wetten.overheid.nl/BWBR0007919/2019-01-01/</u> - artikel 2a).

#### 3) Non-scientific Dutch participants:

De Kaderwet EZK- en LNV subsidies (<u>https://wetten.overheid.nl/BWBR0007919/2019-01-01/</u> artikel 2a). However, the LNV subsidy only covers 50 percent of the total cost. The other 50 percent must be covered by the applicant itself (can be in kind) or a third party.

#### **OTHER**

#### Minimum and/or maximum project duration:

The Maximum duration of the projects to be funded is 36 months (3 years)

# National Official paperwork to complete and sign (including addresses where to send them)

1. To access the national funding, all approved projects will be required to submit a funding application through the WRC Proposal Submission BMS Online System (<u>https://wrc-bms.crm4.dynamics.com/main.aspx#688873383</u>) as the first step for the contracting process. The submission is mainly to capture the already approved projects on the WRC system. The national reporting will also be done through the BMS system. <u>The</u> SA partner will be required to submit the full project proposal approved within the BiodivERsA/ Water JPI joint call highlighting all partners' contribution and funding and a fully signed consortium agreement. For any enquires and support

needed for BMS please contact <u>bms-support@wrc.org.za</u>.

#### **Further comments**

- 1. SA partners are encouraged to include students in the projects for capacity building.
- 2. All projects should be aligned to one or more of the WRC strategic objectives. Check WRC website for more information.
- 3. There must be a clear distinction of new elements and value addition to projects that have been previously funded by the WRC through national calls for projects further submitted to the BiodivERsA/Water-JPI call. Failure to clearly distinguish the new elements will lead to the project being rejected for national funding following JPI approval.

#### **OTHER**

Besides the eligibility check, the SNSF proceeds to a material check. This refers to the applicant's experience and research activity during several years as well as the demonstration of their scientific independence (Art. 4, Project funding regulations). In case of several overlapping SNSF projects, all projects must significantly distinguish themselves from each other (Art. 17, same regulations).

Minimum and/or maximum project duration: 12 to 36 months

# National Official paperwork to complete and sign (including addresses where to send them)

Applicants must submit pre-proposal and proposals via mySNF at the same deadline as the consortium applications. Pre-proposal forms are created by choosing "Programmes (national and international): ERA-Net + EJP: Pre-proposal". Full proposals forms are created by selecting "Programmes (national and international): ERA-Net + EJP" and linked to the pre-proposal by selecting its number in the data container "Link to other SNSF projects".

#### **Further comments**

Please note that you have to complete the DMP on mySNF once the project is approved, regardless of whether a DMP is requested by the consortium. The DMP covers all research data which are generated or used during the project and has to comply with the SNSF Open Research Data Policy.

Minimum and/or maximum project duration: 3 years

#### **Further comments:**

MHESR has reserved up to 50,000 Euro per project to fund joint research projects. This amount may be revised by mutual agreement between the MHESR and team leader.

The release of the second year and the third year of the project budgets will be made after the evaluation of the annual report of the project. A final evaluation will be achieved at the end of the project.

The annual reports as well as the mid-term and the final report have to be sent automatically to the MHESR without prior notification from the MHESR.

MHESR does not provide direct funding to industry as well as non-governmental organizations as part of this program.
