

NEW WATER JPI VISION 2030 AND SRIA 3.0

Olivier Gaillot

Director of Environment,
Energy and Resources

Strategic Research
& Innovation
Agenda 2.0

OBJECTIVES

- Water JPI Vision 2030
- Water JPI SRIA 3.0

A vision for the
Water Joint Programming Initiative

What is it about?

WHY UPDATE THE VISION 2030

- New developments in Europe and globally in terms of water policy, the water challenges of climate change, urbanisation and population expansion (among others)
- New Vision 2030 will outline past and current objectives of the Water JPI goals
- Highlight the integration with other JPI initiatives
- Review of the various water-related policy developments

THE KEY STEPS IN THE PROCESS INVOLVES

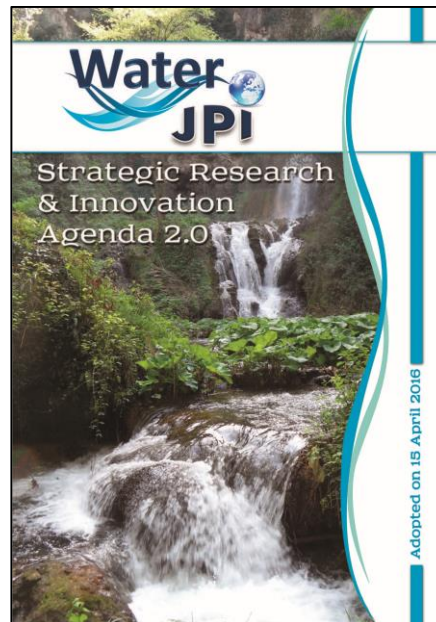

A vision for the
Water Joint Programming Initiative

What is it about?

The Water JPI Vision document

- Revision of the Water JPI Mission Statement
- Review of the key Research Themes
- Review of the Indicators to measure progress towards achieving the Vision 2030.

The Strategic Research and Innovation Agenda (SRIA)

- Based on the new revised key research themes
- Identify the subthemes and key knowledge gaps to achieve the mission of the Water JPI by 2030.

THE PROCESS

Consultative process which has been broken down in six stages;

Stage 1. Literature foresight review

Stage 2. Public Consultation (online survey)

Stage 3. Series of National workshops for key National stakeholders

Stage 4. Series of semi-structured interviews

Stage 5. Consultative workshop with Water JPI Governing Board and Advisory Board

Stage 6. Experts stakeholder workshop

STAGE 1; REVIEW OF STRATEGIC AND FORESIGHT DOCUMENTS

- Literature review of strategic and foresight documents
- Research priorities were categorised
- Information gathered used to inform Vision 2030 and SRIA 3.0 Recurring thread (another word)
- Inclusivity of all societies to clean safe water
- Impacts of globalisation/urbanisation
- Value of water and the “hydro-politics”

LEAVE

ONE
BEHIND

Time for SPECIFICS on the
SUSTAINABLE
DEVELOPMENT GOALS

Homi Kharas, John W. McArthur, and Izumi Ohno,
Editors

STAGE 2; PUBLIC CONSULTATION

- Online Survey as part of the public consultation process
- Total 481 responses were received
- Information collated-feed into Vision 2030 and SRIA 3.0

STAGE 3; NATIONAL CONSULTATION WORKSHOPS

Seven countries held national consultation workshops identify the national perspectives on the key changes that need to be made to the Vision 2030 and SRIA 3.0.

Additionally, European Research Network (ARC: Aqua Research Collaboration) also held a workshop with its members

Output

Summary report of the findings/recommendations

STAGE 4; SEMI-STRUCTURED INTERVIEWS

- Collect the perspective of a wider range of key stakeholders and Water JPI Partner countries
- Ensure that all Water JPI partners/countries have an opportunity to provide feedback/ input into the new SRIA and Vision 2030
- Key stakeholders identified at Governing Board & Advisory Boards Consultative workshop

STAGE 5; CONSULTATION WITH WATER JPI GOVERNING & ADVISORY BOARDS

Consultative Workshop for the Water JPI Governing and Advisory Boards (composed of the Stakeholders Advisory Group (SAG) and Science & Technological Board (STB))

Workshop Objectives

- What the Water JPI Vision up to 2030 could be and which themes should be considered;
- What indicators could be used in the Vision.
- New key scientific themes identified

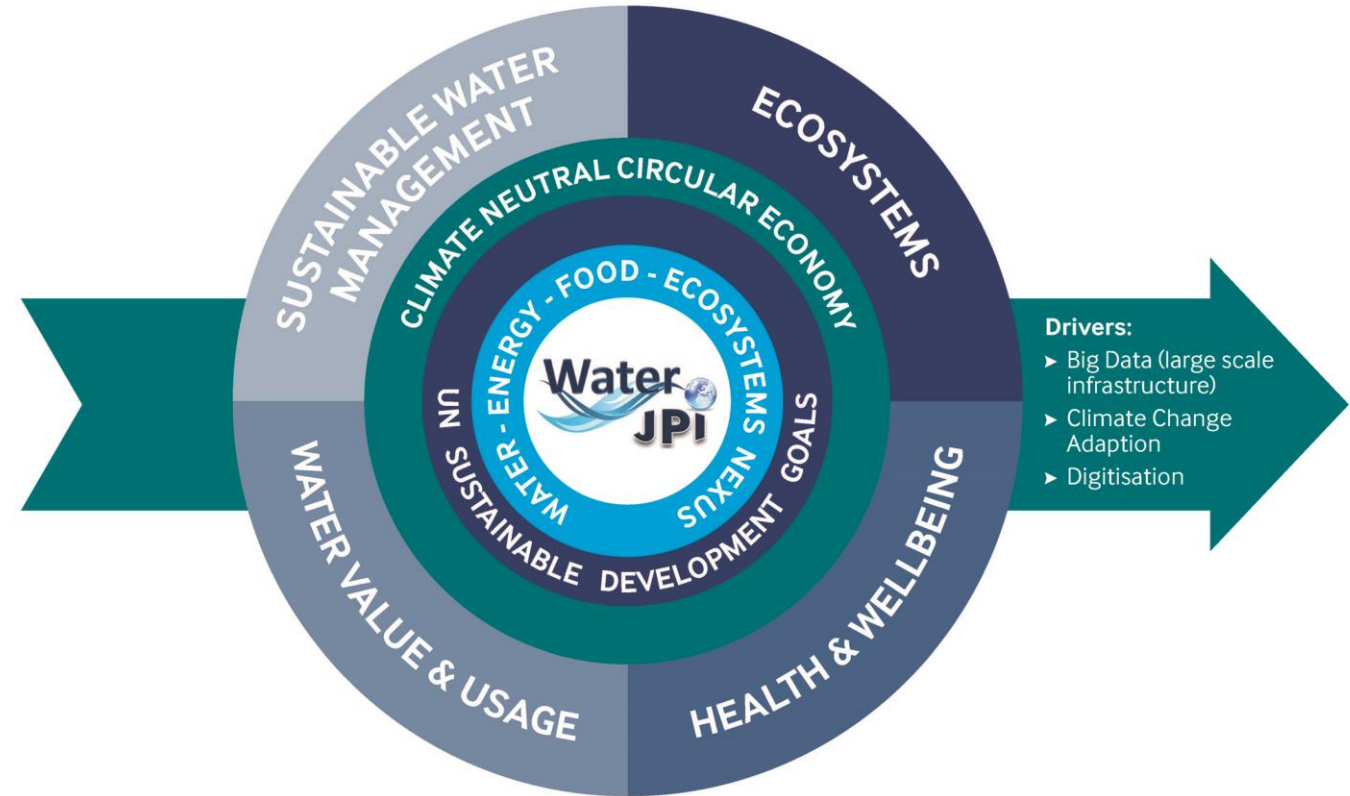

STAGE 6; EXPERTS STAKEHOLDERS WORKSHOP

Objectives

- Inform the drafting of the SRIA 2025;
- Collate information and feedback on the proposed RDI priorities (high-level) under each of the new proposed themes;
- Identify what may be missing;
- Identify what may still be valid from the current SRIA;
- Discuss expected impacts & indicators;
- Review research infrastructure needs/gaps.

PROPOSED STRUCTURE OF THE SRIA 3.0

- Proposed structure
- New key scientific themes
- More integrated approach with cross-cutting issues

DRAFTING THE NEW SRIA 3.0 AND VISION 2030

Based on the outcomes from the consultative process, the new Water JPI Vision 2030 and SRIA will be prepared in November 2019.
